

**D R A F T**

**Dear Mr. Shipley:**

**This is in reply to your letter of June 1, 1966, with attachments, concerning the Corps of Engineers Report on the Wabash River Basin.**

**Pursuant to authority from Congress the Corps of Engineers is completing the studies of the proposed Helm and Louisville Reservoirs as part of Interim Report Number 3 of the Comprehensive Study on the Wabash River Basin. The present status of the studies has been under review in the office of the Chief of Engineers and has been discussed by telephone with the appropriate field offices with a view to expediting this report.**

**The District Engineer has held public hearings and prepared portions of the report on five reservoirs and one local protection project, which are being reviewed by the Division Engineer. However, additional studies of project formulation, recreational uses, water supply and water quality control are currently being made in coordination with the various State and Federal agencies concerned with these matters.**

**Recognizing the importance of the Wabash River Basin to the economy of the area and the need for expediting the report, every effort is being made to complete the study at the earliest practicable date. In view of the extensive coordination and studies required for sound recommendations and conclusions, the District Engineer's report cannot be completed and submitted before October of this year.**

It is regretted that the Wabash Report cannot be properly completed at an earlier date. However, you may be assured that every effort will be made to expedite submission of the report to Congress.

Sincerely yours,

Dear ~~Mr. Shipley~~ <sup>CONGRESSMAN:</sup>

~~I HAVE CHECKED ON YOUR INQUIRY  
This is in reply to your letter of June 1, 1966, with attachments,~~

concerning the Corps of Engineers Report on the Wabash River Basin.

Pursuant to authority from Congress the Corps of Engineers is completing the studies of the proposed Helm and Louisville Reservoirs as part of Interim Report Number 3 of the Comprehensive Study on the Wabash River Basin. The present status of the studies has been under review in the office of the Chief of Engineers and has been discussed by telephone with the appropriate field offices with a view to expediting this report.

The District Engineer has held public hearings and prepared portions of the report on five reservoirs and one local protection project, which are being reviewed by the Division Engineer. However, additional studies of project formulation, recreational uses, water supply and water quality control are currently being made in coordination with the various State and Federal agencies concerned with these matters.

Recognizing the importance of the Wabash River Basin to the economy of the area and the need for expediting the report, every effort is being made to complete the study at the earliest practicable date. In view of the extensive coordination and studies required for sound recommendations and conclusions, the District Engineer's report cannot be completed and submitted before October of this year.

It is regretted that the Wabash Report cannot be properly completed at an earlier date. However, you may be assured that every effort will be made to expedite submission of the report to Congress.

Sincerely yours,

W. Marvin Watson
