AV BUDGET WORKSHEET - SUM	PACIFIC ISLANDS V DATE; DATE; DEPART	MENT: TICANS	4
ACCOUNT $4 - 1, 530$	JNDING NEW U.S. & MICRONESIAN PAY		FY 73
Pav Raise	to Fund Jan. 1971 Civil Service	-	XXXX
Contract & Micronesia	gs applied to Fund U.S. n Pay Raises	XXXX	
AD JUSTED FUNDING	· · · · · · · · · · · · · · · · · · ·	\$ 1400,850	\$ 14/11/11

NOTE: The markup of Porsonnel Compensation and Other Object Codes is tentative and based on the following:

- 1. The U.S. Civil Service pay raise of January 1971 was not reflected in the allocations for FY 1972 and FY 1973 (and onwards). A Budget Amendment of \$241,000 was submitted to the U.S. Appropriations Committees as an add-on to the FY 1972 request of \$59,739,000, increasing the total FY 1972 request to \$59,980,000 The markup is based on the assumption that the Trust Territory will receive the full amount requested in FY 1972 and permits an increase in other object codes which had been reduced to accommodate the higher civil service scales. The FY 1973 markup assumes that the \$2,000,000 for increased pay cost can accommodate the increased cost of civil service that year.
- 2. The markup assumes that the Position Classification and Salary Plans contained in the EMSI report will be the basis of salaries paid to Micronesians in FY 1972 and FY 1973. The markup is based on the current official classifications as approved by Personnel. Changes in classifications cannot be assumed for budget purposes.
- 3. The markup assumes the Expatriate Salary Schedule approved by the High Commissioner, March 22, 1971, will be in effect in FY 1972 and FY 1973.
- 4. FY 1972 and, to a lesser extent, FY 1973 funding of increased pay costs presents a real problem. All FY 1972 positions shown as New or Vacant at the time of submission have been lapsed 15% to accommodate the higher pay scales. It is hoped that FY 1971 savings in Operations will fund all or most of the balance required to absorb. In FY 1973 only New positions are lapsed, also 15%. There again it is hoped that the \$2,000,000 for increased pay cost will fund all or most of the additional costs.
- 5. The markup is subject to significant changes if other pay scales (than those above) should prevail, if the \$241,000 for-U.S. Civil Service pay raise is not received, if sufficient savings from FY 1971 are not available, and if the lapsing approach taken both years fails to bring budgets into funding balance.

SUN IRING MATION		a and a			And the good is been
FY 1972 \$1,400,000	FY 1973 \$1,4	180,000	Increase	\$80,000	And the second is boot

A total of \$1,480,000 is required to support Sea Transportation operations in FY 1973, and increase of \$80,000.

Sea transportation provides an extremely vital component of the development of an evenly balanced economy in the Trust Territory. Only by the use of regularly scheduled ships can each district grow, prosper and maintain properly balanced population centers. The development of a viable economy in the outer islands is necessary to prevent an increase in the present trend of migration to the district centers. This evenly balanced economy can only be developed and maintained if the Trust Territory interisland fleet can establish and maintain a regular service to the outer islands. This fleet delivers needed supplies, medical and educational personnel and government equipment, and picks up exports (fish, agricultural products, copra, etc.) when the outer islands are able to develop these products as a result of the certainty of a regular ships' service. A rapid increase in passengers and cargo aboard the vessels has been noted in recent years and there. is every indication that it will continue. In the present plans for Trust Territory growth, this increase can only be met by a Trust Territory interisland fleet of sufficient size and in such good mechanical repair that it can maintain a regular schedule between the district centers and the outer islands.

Sea transportation within the Trust Territory is complemented by transpacific shipping which is operated by a contractor, Micronesia Interocean Line, Inc. that is working under a 10-year contract initiated on September 1, 1968. The contract calls for scheduled direct linkage with the United States West Coast ports as 1 as direct calls at Japanese and other far Eastern ports. The contract also

030024

requires the development of a Micronesian-owned, operated and staffed Company by the end of the 10-year period.

Interisland shipping is programmed to be accomplished in FY 1973 through a government-owned fleet of 12 ships, a lagoon boat, a tug and some non-powered barges. Five of these ships will be operated regularly within specific districts through charter agents who are guaranteed enough revenue to compensate for differences in operating cost and commercial revenue. \$330,000 is budgeted to cover the subsidy costs for these vessels.

Seven ships will be operated at various locations throughout the Territory for purposes of relieving ships to go to annual overhaul, supplementing District requirements and special missions. These ships will be operated either by regional agents or directly by the Transportation Division. Some of these ships may be operated rather consistantly in a single district. The cost for operating these vessels is estimated at \$905,000.

Yearly drydocking and annual overhaul cost for all vessels is estimated at \$400,000. The government pays no hull and machinery premiums on its vessels because past experience has shown that no substantial benefit accrued to the Government for maintaining such insurance. Other insurance and miscellaneous costs total \$67,000 for the fleet.

The increase of \$80,000 in FY 1973, over the FY 1972 budget, includes \$90,000 for the operation and insurance premiums of the new construction vessel scheduled to be acquired during part of FY 1973 as well as \$30,000 for the drydocking of the M/V WANDANK. These costs will be partially offset by decreases in (FY 1972) ect subsidies when two privately-owned vessels, chartered by the government, a) taken out of service.
