MEMORANDUM

September 27, 1973

TO: THE FILE
FROM: MICHAEL S. HELFER
RE: CONVERSATION WITH MR. FAULKNER

Mr. Faulkner is in charge of the acquisition of leaseholds for the Army Corps of Engineers. He is located at the Forrestal Building, Room 3G063, Telephone No. 693-6855. In the course of our conversation he agreed to let me see the form lease the Corps uses, and perhaps some expired leases as well. I asked him about Glasgow AFB and Williams AFB and leasing in the territories generally, but he was not particularly helpful and told me that generally leases are recorded in the jurisdiction in which the land is located. After I identified the client I was working for he suggested that I call Mr. Roy Markon, who he said had recently been out to Micronesia to negotiate a lease of land for the Army, although Markon works for the Naval Facilities Engineering Command. (Markon is apparently the Executive Assistant for Legislative Services to the Director of Real Property Management of NFEC.)

Jay Lapin was not familiar with Markon, nor with the reason that he might recently have been in Micronesia to negotiate a lease. I will call Markon after I get some background from the documents that Faulkner is supposed to show me today.
