MEMORANDUM FOR MESSRS. LAPIN AND HELFER

Subject: Micronesia - Carnegie Endowment Working Paper

This is the initial working paper which has emerged from the Carnegie Endowment study of Micronesia. It reflects some of our informal views but its conclusions are contrary to the interest of our client. Do you have any suggestions as to what approach I should take, other than a policy of consistent delay in the hope that this study never sees the light of day until our Status Agreement is signed?
