## United States Department of the Interior

OFFICE OF THE SECRETARY WASHINGTON, D.C. 20240

dr.f 7 - 1976

Dear Mr. Ellsworth:

I am writing you in reference to the plans of the Defense Department with regard to the Northern Mariana Islands. As you are aware, the Northern Mariana Islands are now in the process of making a phased transition from their present political status to that of selfgoverning United States commonwealth. An important element of the transitional efforts has been the institution of an Office of Transitional Studies and Plans. This Office, the broad outlines of which were agreed upon during the political status negotiations, has assumed the responsibility for economic, physical and social planning for the new Marianas government. As you are also aware, it is expected that constitutional government including an elected chief executive will be installed in the Northern Mariana Islands by the beginning of 1978 under the terms of the Covenant (Public Law 94-241) and the Trusteeship Agreement.

The transitional plans and policies for the Northern Marianas are set by a Joint United States - Marianas Transition Commission of which the Director of Territorial Affairs of this Department, Mr. Fred M. Zeder, is the Federal Co-Chairman. One problem which the Transition Commission has encountered as it seeks to guide the work of the Office of Transition Studies and Plans is a lack of knowledge of the plans of the Department of Defense with regard to those portions of the Covenant, particularly Title VIII and the Technical Agreement, which relate to the lease of land for contingency national security purposes. Section 2, Acquisition, of the Technical Agreement provides that unless the United States exercises its option to lease the lands specified in section 802 of the Covenant and makes payment for same as specified in section 803 of that document, within five years from the effective date of those sections which we expect to be January 1, 1978, the United States loses its ability to lease those lands under the terms specified. It would be most helpful for this Department to have the benefit of the Defense Department's thinking as to when during the period of 1978 through 1982 it intends to seek Congressional appropriation to effect the lease. I might point out that it would appear advantageous for the United States to effect the lease payments early in the five year period since the amounts specified in section 803 of the Covenant are required to be appropriated at levels commensurate with the change in the value of the dollar as indicated by the price index from February 15, 1975. percentage change in the United States Department of Commerce composite

13864 03.413722 To further accentuate our informational need, I might call your attention to section 803(e) of the Covenant which provides that the amounts made available by the United States for the lease of the Tanapag Harbor area on Saipan island shall be established as a trust fund by the Government of the Northern Mariana Islands for the development and maintenance of a local park which may include appropriate memorials to American and Marianas casualties of World War II. We are anxious to see proper planning for this important park and recreational area and would appreciate your views on the best time frame to anticipate the commencement of land clearing and construction.

As a related matter, I am enclosing an editorial from Guam's Pacific Daily News dated September 13, 1976. As you can see, there still exists considerable confusion in both Guam and the Northern Marianas about the intentions of the Defense Department. While we recall the substance of your testimony during the Senate Armed Services Committee hearings on the Covenant to the effect that the Defense Department has no present plans for base construction on Tinian island, we must conclude that our understanding is not shared locally.

In addition then to your kind response to the particular questions which I have posed above, I would hope that the Defense Department would give serious consideration to issuing a press release for dissemination in the Northern Marianas and Guam indicating that even after the United States exercises its land lease options in the Northern Marianas, it has no present plans to construct a major joint service facility on Tinian if such remains your intention. I believe this information would help to allay any misunderstandings which may now exist on Tinian and in the Northern Marianas generally.

2

Sincerely yours,

Secretary of the Inter

	Much of the iverth land the world, from Vietnam, to Thankund, to the Philippines has been lost to the U.S. military over the past fewyears. So the Tarines don't reall have much space left in which te practic whitt they do. They are looking, with som interest, towards the largest of the Palauan islands, Babelthuap, as a possible fall-back position as well, but real negotiations haven't even begun there. There are some skeptics who believ that changing defense needs may hav outdated the idea of a base on Tinian even before work on it even gets tarted. Today defense is geared towards missiles, an not a stuckpile of contentieral bombs o amphibious landings. Thus we wind up with two kinds of peopl among the islanders – those who worry that the won't. Any such activity is bound to have in Any such activity is bound to have in mediate economic affect in Tinian, and the same and Saipan. Unresolved also is the question of th large dairy ranch on Tinian, leased by Ke Jones. Will it remain, or will the ranch the largest in Micronesia – he forced of defense up its much soon and announces intertuble for the work to begin. Thus fi intertuble for the work to begin. Thus fi intertuble for the work to begin. Thus fi intertuble for the work to begin. Thus think that the people of Tinian have been limbo too long already. JCM.	ng these the three-way contest with For a good and McCarthy is certain
