MEMORANDUM FOR THE FILE

It now appears that a short report on the alleged Micronesian bugging will be published within two weeks. The staff has completed a draft of the short report, but it has yet to be approved by the members of the committee. In addition, there will be a longer report containing more details growing out of the committee's investigation. However, that report will probably not be published for several months, in part because it has not yet fully been drafted, and in part because there may be disputes concerning when all of the information proposed to be included in that report can be declassified.
