Delegate Paul A. Manglona
Chairman, Committee on
Local Government
2nd NMI Constitutional Convention
Saipan, CM 96950

Dear Mr. Chairman:

Thank you for this opportunity to present my comment
on Delegate Proposal No. 109-85.

Mr. Chairman and honorable members of the Committee on
Local Government, I am very happy that the Second
Northern Marianas Constitutional Convention is showing
that the present system of the Municipal Government
is far most different from the past municipal system
before the Government of the Northern Mariana Islands.
During the previous administration of the Municipal
Government, many people were given assistance regardng
necessities in many ways but at the present, hardly any
services are available for the people. This is probably
caused because of the Commonwealth Government. Not to
mention the fact that all the heavy equipment were
transferred to the present Public Works which alters
direct service to the people.

Also, the district commissioners were doing excellent
service. The people know where to turn to when they
encountered problems, whereas, at the present time,
there is no one specifically close to ask for help.

Mr. Chairman and honorable Committee, I support the
Delegate Proposal No. 109-85 to amend Section 2 of the
Article VI of the Northern Marianas Constitution relating
to Election of Mayor...to abolish the Mayor's Office on
Saipan and to replace it with precinct commissioners...
in such case that the new section to have precinct
commissioners, more attention will be given especially
in emergencies. Also, accurate records regarding

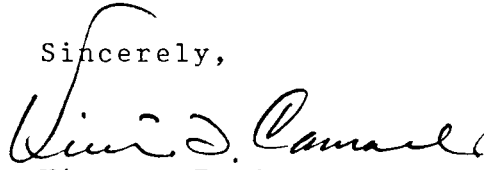

Rec'd 7/8/85

Delegate Paul A. Manglona
Page 2
July 8, 1985

statistics as to a month or year - how many births, deaths, and marriages. This will also assist in conducting census when necessary, etc.

Mr. Chairman, I am in full support of this proposal under the circumstances that the new section, the precinct commissioners and the Office of the Chief Commissioner will provide assistance and services close to the people.

Sincerely,

Vicente T. Camacho
