REPORT TO THE CONVENTION BY THE  
COMMITTEE ON FINANCE AND OTHER MATTERS

Subject: Committee Recommendation No. 23

The Committee on Finance and Other Matters recommends that the Convention meeting in Committee of the Whole adopt the attached constitutional provision relative to the definition of public purpose.

The proposed constitutional amendment would permit the legislature to determine what may and what may not be considered public purpose for which tax revenues may be allocated. In delineating the various causes to which tax revenues may be allocated, the Legislature shall be guided in its choice of recipients of public funds by the following restatement of the analysis to the Constitution.

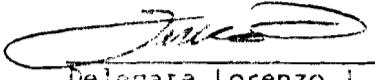

"A public purpose is one that directly and substantially benefits the public welfare. The direct and substantial benefits to the welfare necessary for a finding of public purpose must be reasonably foreseeable and reasonably likely to occur. This section does not prohibit government participation with private investors in enterprises that will benefit the public welfare. A public purpose does not include an objective that brings benefits only to few persons or corporations, that results in profits most of which are exported from the Commonwealth to the benefit of persons in other countries, that redresses private wrongs, or that improves private property."
