Dear Jeff,

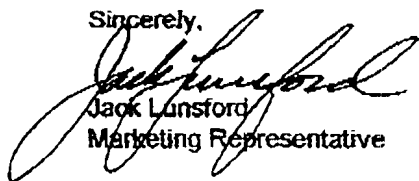

This is the absolute "Best" deal going on our new 5365FIN copier! Since your office operates one of these fine machines, you are already familiar with what a great masterpiece of engineering technology the it is. No need to expand on that - right?

Now here is the good news! I can now offer the 5365FIN (same as M&B) on a "Federal Site Plan". This GSA contract not only (greatly) reduces the price of the machine, is also provides for a Flat Rate Maintenance cost of \$456 per month (no per copy charges). To give you an example of the savings; The Management & Budget machine is on a 60 month contract @ \$655 per month. Your present copy volume is 23,000 copies per month @ a per copy charge of .0118¢ - or - \$271.40 per month. Your combined cost is \$926.40, or .04¢ per copy. If you compare that cost to the new proposal on the 60 month plan (same volume), there is a savings of \$27.69 per month.

Now, consider a copy volume of 70,000 copies - which is closer to what the Con Con will be doing. Your M&B machine would cost \$1,481 total (\$826 in copy charges) - and the new plan would cost the same \$898.71 or, a savings of \$582.29 per month. It would be nice if, after the Con Con, the new 5365 could be utilized by the Legislature. Greg Sablan has been trying to get the funding to replace the two Canon copiers for two years now. Their volume is 70 to 80 thousand - per machine! Then, later, he could trade both Canon's in on another 5365FIN and be set (just a thought).

If you choose to "Outright Purchase" the 5365FIN, your only cost would be the \$456 plus supplies. As always, I am prepared to provide further information or answer any questions you may have. If your wish to proceed with an order, please give me as much advance notice as possible so I can ensure delivery on the date you request.

Sincerely,

  
Jack Lunsford  
Marketing Representative

Herman,

The maintenance on this  
is \$456.00 per month.
