3. EDUCATION DEPARTMENT

(a) School. The school consists of one dilapidated six-room building, 21 teachers, 753 children enrolled on half day sessions in large classes. The seventh and eight grade classes were discontinued in order to satisfy demands made for labor. Schooling is now being provided for children of ages 7-14.

(b) Vocational Education Trainee Program. The apprentice training program carried on with 15 and 16 year olds in Public Works, Motor Pool, Fishing Base School, Farm, and Hospital was discontinued when the children were used for labor. Four girls who are training to be teachers continued in their work.

The 21 teachers are working on an in-service training program whereby the teach half a day and go to school a half day. Since there were no trained teachers among the Chamorrans this method is used to train the teachers.

(c) Adult Education. Evening classes in English are held three nights a week with an average attendance of 150. Teachers for this work are selected from among the English-speaking Natives.

1 May 1946

Naval Military Government Monthly Report.

A 15 minute spoken English lesson is flashed upon the screen before the movies, which are held twice a week.

(d) School Farm. A 10-12 acre farm is under cultivation by the school children. A bred sow has been secured, a 60 foot farm building has been constructed and a chicken house is now being built.

(e) School Library. A school library has been organized and over 200 books catalogued. Books have been secured from the Special Services library and from various disbanding units.

(f) Photographic exhibits of class rooms in the Charan Kanoa school are enclosed as exhibits (1), (2) and (3).

3. ADMINISTRATIVE DEPARTMENT

(a) District Chiefs. The Head Chief and the district chiefs meet regularly once a week to discuss the various problems which arise in the village of Chalan Kanoa. The Area Commander from Military Government attends these meetings.

(b) Housing. Housing which is #1 problem in Chalan Kanoa progresses slowly due to lack of availability of lumber and labor. There are 198 houses to take care of 857 families.

(c) Relief and Public Assistance. All the Natives are on government relief in that they are fed and housed at Government expense. Electricity and water is also furnished them at government expense.

(d) Recreation. American moving pictures are shown in the camps twice a week

4. LEGAL DEPARTMENT

5. LABOR DEPARTMENT

(a) Trend. The shortage of labor is acute. The demand of the various activities is far in excess of the supply available.

Naval Military Government Monthly Report.

(b) Employment. The number of Chamorrans and Okinawans in the employment of the U. S. Government activities on the island took a sharp increase this month when 15 and 16 year old children were added to adult labor lists. Many men and women who have been working independently were added to the government payrolls.

(c) Daily average numbers of registered civilian laborers during the month.

7. ECONOMICS DEPARTMENT. This department has been absorbed by the USCC and its report is given here with.

(a) General.

(1) Agriculture. Due to the increased acreage and development of the small farming program, production is steadily increasing. Weather has been favorable most of the month and in general growing crops appear to be in good condition in all areas. There are now 114 farmers in two locations. Members of many of the families are now working in the fields and around the small houses from time to time. The farmers are putting in long days and are taking good care of their small houses and oxen. 32 houses were painted this month by the farmers and the appearance of the Aslito Farm community is much improved.

(2) Trade Goods. Sales to the Chamorro store amounted to \$ 9175.32 during the month. Deliveries of essential items are made to the Okinawans through the trade store each week. A wider variety of articles has been put in the store and sales are increasing. An interior view of the trade store is shown as Exhibit (4)

(3) Handicraft. Sales at the retail stand amounted to \$4687.90 for April. As of 1 May 1946 the sale of all Handicraft goods will be turned back to the Chamorros. The manager of the association will be the manager of the retail stand and it will become a regular Chamorro enterprise. Many full time handicraft workers have been transferred to other jobs and production may decrease unless articles are made on a part time or after hour basis.

(4) Small Business:

	Workers	Receipts
Bakery	5	\$ 60.00
Seamstresses	26	193.83
Barber Shop	4	58.70
Florist	2	66.78

Jewelry Shop	3	162.15
Hat Shop	1	7.51
Beauty Shop	1	18.00
Lawyer	1	12.00

(b) Lands and Operations

(1) Aslito Farm Association. There are now 39 farmers who have completed their sheds or small equipment houses. Nearly all have been painted. The new central trucks. A new 10 acre area has been cleared by the U. S. Commercial Company and Chamorros have been placed on this land. Coral has been hauled and a culvert installed at the central shed. The farmers appear to be happy and are working well together. A jeep has been furnished to the superintendent of the group for daily use in visiting farmers and procuring supplies. The average size of the farms is 3 1/2 acres. The farms cover a large area.

1 May 1946

Naval Military Government Monthly Report.

(2) Chamorro Farm Association. There are 75 farmers on 219 acres in this group and still more land is available. The average farm size is 3.33 acres. Production reached 118,695 pounds this month, all produce going to the Military Government Supply Department. A small green-house for growing seedlings and propagating plants was built by the group and a Chamorran was hired by the Association to handle the project. This is another case where the Chamorros handle their own improvements for their mutual benefit. The U.S.C.C. Representatives encourage enterprises of this kind and from time to time suggest improvements as well as exercising control over the farm program through the Association officers. The manager of the group, Mr. Gregorio Camacho is very cooperative both with the farmers of his group and with the U.S.C.C. Representatives.

(3) U.S.C.C. Ranch #1 There are 30 acres of corn and 4 acres of tomatoes now growing on this ranch. Five Chamorros are working this area under a Chamorran foreman on a day basis. The Unit Garden started with the Naval Air Base, Tanapag has been given up due to lack of personnel. The U. S. C. C. has no service personnel on this ranch.

(4) Nursery Project and Headquarters Area: Eggplant and tomatoes have been harvested from this area. The tomato trials have proved interesting and helpful. Seed from the best varieties has been taken by one of the Chamorro association for experimental planting. About 500 potted plants were given out during the month. No others are planted to replace these due to lack of personnel able to assist and direct the project. Two Chamorros have been assigned to work in the nurse project until all plants have been disposed of.

(5) Equipment and Inventory. All farm machinery and equipment not in use was cleaned up, and placed in storage in the large (50' x 100') Quonset from the Army engineers in February. Small equipment in the Quonset huts was cleaned and inventoried under the direction of Mr. Pohorily. The Fertilizer in storage was separated and restacked in the warehouse. Seed containers (14" powder cans) were obtained from the Naval Magazine and the best seed on hand was fumigated and placed in tight storage. The garage continues to operate with three Chamorro mechanics maintaining and repairing all trucks and other equipment. Some repair parts and equipment are difficult to obtain and frequent trips are made to the island trash and salvage dumps to procure them. Major assemblies, such as transmissions and differentials for jeeps and trucks needing repairs are salvaged and installed.
