TRUST TERRITORY OF THE PACIFIC ISLANDS
OFFICE OF THE CIVIL ADMINISTRATOR
SAIPAN DISTRICT, NORTHERN MARIANAS ISLANDS

REPORT NO. 7

1 October 1947

Enclosure:

- (A) Employment of Natives.
- (B) Native Census with Vital Statistics.
- (C) NavPers 353 (Roster of Officers)
- (D) Summary of NavPers 625 (Enlisted Personnel)
- (E) Charter of Municipality of Saipan.
- (F) Visits by Civil Administration Officers.
- (G) LTJG J. A. Bernier's Report on Chi Chi Jima.
- (H) LTJG K. R. Burn's Report of Bronchopneumonia Epidemic on Rota Island.

PART I - NATIVE AFFAIRS

Section A - Rehabilitation

1. Rehabilitation: Repair or replacement of native Structures:

(a) Replacement of homes lost during the invasion stages of the Saipan operation is a continuing process. Every effort is being made to reestablish the natives on their own lands. Whereas they are all housed, in many cases, several families of the same kinship group are occupying the equivalent of a three room house, Civil Administration endeavours to keep advised of abandoned Military Areas offering possibilities of salvage materials. Working parties are organized to clean up the site in return for the salvaged items. As most of the temporary structures would be destroyed by burning and require subsequent clearing of unburnable items, an actual saving to the government results in this process.

Rota Island is showing a nice recovery from last years-disasterous typhoon. Now that all of the crops are planted the rebuilding of the new village of Song Song is about completed. This village is at the site of the previous NKK company town. All reconstruction work has been done by the natives under Civil Administration supervision at no cost to the government. It is interesting to note that the principal structural members, corner posts, sills, roof joists, etc., are hewn from the very sturdy native ifil trees. It is a beautifully grained and colored wood, which is capable of being worked up into such fine pieces of furniture that it seems a shame to use it as rough lumber in house construction.

(b) Schools: Saipan's one school, in Chalan Kanoa, was enlarged by the addition of three classrooms on the rear wing of the building. The front building of the school was rebuilt since our occupation and is in good shape; however the rear building which was left standing has been in rather sad condition. The new rooms are a marked contrast in their bright interiors and sound roof,

PART I - NATIVE AFFAIRS

Section A - Rehabilitation (Continued)

Rehabilitation (continued)

Rota -- The school is ready for occupancy and is as good as any in this area. Conversion of a Japanese concrete structure in good condition was resorted to in this project.

(c) Churches: The work of casting concrete frames and inserts for the new Catholic Church is going ahead. This is being accomplished under the direction of Father Ferdinand and Brother Orquietz. A model of the new church has been completed and is on display in front of the present church. It is cathedral like in proportion and represents an extremely ambitious program of church reconstruction. It is estimated that initial costs will aggregate eighty thousand dollars (80,000).

Reverend Stevens of the Baptist General Board of Foreign Missions is well along toward completion of the first unit of his establishment as he is now occupying a prefab house on the site allocated to them. It is his intention to put a chapel, recreational and teaching facilities as well.

Rota - A request has been received from the Reverend Marcian Collett, OFM Cap., Catholic Missionary of Rota Island for two separate tracts of land on Rota. The first, a small portion of what was formerly Japanese Government land adjoining the site of the former Island Cemetery of Rota. It is Father Marcian's intention to reestablish that cemetery by bringing back all the remains from the far away overcrowded plot given to the natives by the Japanese Government. The second, the allocation of the old NKK refinery office buildings, for use, in the near future, for a convent or a school for same. Unless there are unforeseen legal bars to approval it is anticipated that these requests will be granted.

Work on the reconstruction of the Catholic Church has started but due to the fact that most of the people are working on the farms and the village, the work is progressing slowly.

(d) Community Buildings Important in Local Culture: None.

(e) Slight progress can be reported on the reconstruction of Tanapag. When it was determined that the area allocated by the previous Island Commander consisted principally of tracts of private land, further construction was held up, pending proof of the land claims by the private owners concerned. Some dissatisfaction was evident on the part of the have nots, who would have obtained home sites under the plan that had been approved, but by and large it is believed that the majority recognize the wisdom of not further complicating the land situation.

Construction on Saipan during the quarter consisted of:

Individual houses completed	21
Individual houses under construction	4

PART I - NATIVE AFFAIRS

Section A - Rehabilitation (continued)

Rehabilitation (continued)

Other construction completed:

Mise and Soya Factory	2
Butcher Shop	1
General Merchandise Store	2
Vehicle Repair Shop	2
Timber Yard	<u>1</u>
Total completion	33

Welfare

The Native Welfare Society handled one hundred sixty (160) indigent cases, including care of six (6) lepers, and issued the following rations:

Rice	2150 lbs.
Milk	21 Cases
Salmon	15 "
Pork	2 "
Beef	2 "
Soup	6 "
Flaked Fish	36 cans
Sugar & Salt	100 lbs.
Cloth	213 yds

3. Land Titles Investigation Commission

It is regretted that little real progress can be reported under this caption. Due to reduced appropriations with consequent loss of officer personnel there has been insufficient personnel to keep pace with a changing program and still devote time to what is really a basic problem in reestablishing a sound economic foundation. A start has actually been made however on the settlement of the Tanapage claims.

Throughout July and August the practice of granting conditional land-use privileges to persons presenting reasonable assurance of ownership was continued. Such land is invariably used for agricultural purposes and no permanent structures are erected. On 20 September all documents, records, and charts, including those of Japanese origin, were assembled in a central office.

Mr. Jose S. Pangelinan, who has capably headed our Labor Department for a number of months, has been relieved of some of his duties and is the Executive Secretary of the Commission. Additional native clerical help is being assigned. The plan is to have this staff work up the necessary data on the claims and set dates for the hearing before the Commission. With the arrival of replacement officers, anticipated about 15 October, regularly scheduled hearings will be held three (3) days per week. Detachment of officers has made it difficult to keep a board together for any period of time.

PART I - NATIVE AFFAIRS

Section A - Rehabilitation (continued)

4. Titles Investigation Commission (continued)

Ultimately it is hoped that authority to exchange Japanese government lands for private lands now in use by military organizations will be reserved.

4. Claims: None.

5. Summary

As noted in the previous report the provision of public utilities in the housing areas presents the major problem. Installation of the water system in the new section of Chalan Kanoa to the eastward of Texas Road, is well on towards completion. This will add materially to a better living standard in an area now covered by approximately 100 better than average homes.

Now and vital factors in the rehabilitation program are the following:

- (a) Unemployment as the result of lay-offs from jobs with the U. S. Government.
- (b) Sharp increases in the cost of living.
- (c) The assumption of financial responsibility for a substantial share of Municipal Administration.
- (d) The levying of taxes.

To meet these new conditions it is expected that many of the people will revert to subsistence farming and fishing. Others will attempt to establish themselves in some kind of business enterprise. Not a few will probably wish to leave Saipan for the jobs on Guam or in the copra industry in the Northern Marianas Islands.

Whatever the adjustments that may be made, it will probably take months to determine how far the rehabilitation program has been set back or enhanced by these new conditions.

Section B - Health and Sanitation

1. Civil Administration Hospitals and Dispensaries:

- (a) Civil Administration Unit Dispensary, Saipan District, Saipan, M. I. is located four (4) miles south of the Naval Operating Base, Saipan, M. I., on the west coast high-way.
- (b) Total number of Beds: 100

Extractions	- - - - -	61
Fillings	- - - - -	23
Treatments	- - - - -	3
Examinations	- - - - -	148

A Dental Survey of the Native Population was conducted by the Fleet Dental Clinic, Naval Operating Base, Saipan, M. I., during the month of July - following is Dental Officer's Report:

"Dental Survey of Native Population, Island of Saipan."

1. On July 1st 1947 preparations were begun for an extensive dental survey of the Native Population living on the Island of Saipan. Equipment was drawn from the Civil Administration Dispensary and the Fleet Dental Clinic, and consisted of a portable chair (field type), portable operating lamp (field type), instrument stand, typewriter, mouth mirrors, explorers and sterilizing solution.

2. 98% of the Native population lives in one of the three centrally located villages on the island; it was felt that it would create less confusion if the Dentist and his assistant set up the equipment in each village on certain days. The village Commissioner co-operated to the utmost not only aiding the Dentist in his selection of a location within the village but also in appointing section leaders from each village to compile rolls of the community and see that adequate publicity be given the dental program.

3. It must be remembered that Radiographic facilities were not available and in view of that fact a great many interproximal carious areas may have been overlooked. The survey thus consisted of a visual and digital examination of the teeth, lips, tongue, and adjacent soft tissues and was made as complete as existing circumstances permitted.

4. Children under 6 years of age were excluded from this survey in order that a more truly representative number of permanent teeth charted. Each patient was given a chart similar to the Navy H-4 and oral defects were noted thereon. Name, age, sex, and pertinent family history were included with each examination in order that a correlation between caries incidence, age and sex could be made.

5. Four divisions or classes were noted with respect to the various dental needs of those examined. They are as follows:

- Class 1. Patients whose dental and oral health is such that they are in dire need of emergency dental treatment.
- Class 2. Patients in need of operative dentistry which, while not of an emergency nature, is such that if some

PART I - NATIVE AFFAIRS

Section B - Health and Sanitation (continued)

Civil Administration Hospital and Dispensary (continued)

treatment is not administered the patient will soon be in Class 1.

Class 3. Patients whose oral health is such that they are in need of prosthetic appliances. This group also includes some patients who have need of operative work before prosthetic restoration can be begun.

Class 4. Patients whose oral health is such that they are in need of no dental treatment other than oral prophylaxis. It is to be noted that all cases of those examined, there was a decided need for a thorough oral prophylaxis.

6. There were no oral manifestations of the various blood crasians and in most cases of gingivitis or periodontoclasia the etiology seemed to be more mechanical than physiological due to the presence of immense amounts of calculus about the cervices of the teeth. A combination of beetle nut and tobacco which is chewed by the natives seemed to have no detrimental effect upon the teeth, but it was noted that in all cases where sclerosed areas on the dorsum of the tongue and also the cheeks about the areas of the first and second molars. These sclerotic areas were irregular, rough, indurated and non-vesicular and to all intents non-pathological although in no case was an biopsy made. All patients seemed healthy and well nourished and there were no evidence of avitaminosis.

7. The following is a summary of patients in such classes:

Class 1	- - - - -	19
Class 2	- - - - -	3127
Class 3	- - - - -	423
Class 4	- - - - -	<u>532</u>
Total patients examined		4191

The survey revealed that 231 patients had an acute gingivitis which was mentioned before seemed to be due to a mechanical, rather than physiological etiology. Periodontoclasia was present in 215 patients and was largely suppurative. In all it was found that 1469 patients were in need of minor oral surgery due to the presence of retained root fragments, necrotic crowns or devitalized pulps. From these figures it can be seen that with a native population of approximately 4200, 0.4% are in need of emergency dental; 71.4% are in need of operative dental work exclusive of oral prophylaxis; 10% need or will need in the immediate future prosthetic replacement of some sort while 13.5% need no dental treatment other than prophylaxis and instruction in proper mouth hygiene.

8. During this examination period it was possible to inspect the offices of the single civilian native practitioner on the

PART I - NATIVE AFFAIRS

Section B - Health and Sanitation (continued)

Civil Administration Hospital and Dispensary (continued)

island, and it was found that although he has no degree similar to that of a practicing dentist in the United States; however-the-less has adequate skill, knowledge, and ability to care for the native population. His present equipment is rather old, but he has on file an order with an American Firm (S. S. White Company) for modern up to date equipment. It is felt therefore that the services of this man plus the help of a second native now being trained at the Fleet Dental Clinic should be adequate in maintaining a high standard of oral health among the Natives of Saipan.

* See Enclosure (G).

** See Enclosure (H).

4. Preventive and Therapeutic Field Work.

(a) See Enclosures (G) and (H).

5. Sanitation

(a) Field Sanitation:

The Sanitation Officer makes three (3) to (4) unannounced inspections weekly to all Native Villages, Food Dispensing Establishments, and Farm Areas on Saipan, M. I.

The Chief Pharmacist's Mate makes two periodic Inspection trips to all villages on the Island of Rota Monthly.

PART I - NATIVE AFFAIRS

Section B - Health and Sanitation (continued)

Civil Administration Hospital and Dispensary (continued)

For the Island of Chi Chi Jima, see enclosure (G).

(b) Native Sanitary Inspectors

(1) Number employed and where, rate of pay:

Saipan, M. I. 1 \$61.44 per mo.

Rota, M. I. 1 1.20 per day.

(2) Number being trained, and where, rate of pay:

There are no natives now being trained as Sanitary Inspectors.

(3) Nature and degree of Supervision:

The Sanitation Officer has direct supervision of the Sanitation Squad.

(c) Native Cemeteries:

The Native Cemetery, located near Chalan Kanoa Village, Saipan, M. I., is maintained by the Village Civil Administration.

The Native Cemetery, Rota Island. Plans have been made to move the cemetery to the site upon completion of the village and church. The new area has been inspected and approved by Commander Marianas Staff Medical Officer. Existing Native Cemeteries require no additional care.

(d) Pest Control:

(1) Insects:

Flies and mosquitoes remain numerous in all areas. Spraying of 10% DDT in kerosene oil or diesel oil is carried out twice weekly in all Civil Administration Unit areas, Native Villages and Farms on the Island of Saipan.

Active spraying with DDT 5% in Xylene carried out on C.A. Reservation and in new village as fly control measure, on the Island of Rota. Additional general cleanup and bushing is being done around all native dwellings. Water points were cleaned and drainage established for Song Song village.

(2) Rodents:

No program is in effect other than trapping, on the Island of Saipan. A total of 2768 rats and 493 mice were trapped in all areas during this reporting period.

An average of six rats per family per month have been trapped on the Island of Rota.

(e) Potable Water Supply:

(1) On the Island of Saipan, all potable water is received from the Central Island Water Supply.

(2) On the Island of Rota, the water supply continues excellent and unlimited in quantity. The pipe line is being extended to the new village to provide additional service to the natives.

PART I - NATIVE AFFAIRS

Section B - Health and Sanitation (continued)

Military Administration Hospital and Dispensary (continued)

(f) Violations of Sanitary Regulations:

There were no violations of Sanitary Regulations during the quarter.

6. Summary

Due to breakdown of X-Ray Equipment for the past five (5) weeks the Chest X-Ray Survey Program has been at a standstill. However, all equipment has been repaired and it is expected that the program will be completed within three to four weeks.

The deworming program continues as previously reported with apparent good results.

Section C - Self-Government

1. Civil Government

(a) Local: (Saipan - Rota - Chi Chi Jima.)

1. Number Authorized by Civil Administration:

The native people of Saipan, in compliance with Commander Marianas directive of 28 May 1947, began to assume responsibility for their own administration on 1 July. Many problems of adjustment to the new conditions had to be faced. It is apparent that these problems will require considerable time, patience, and persistence before they are eventually solved.

As a result of the initial stages of planning and the realization of what it would cost to run the Municipal Government some rather interesting developments took place in the adoption of a charter and a general election of all Municipal Officials. It was felt by the Civil Administrator that the electric light and power facilities were too expensive to operate and it was suggested that a stock of candles, lamps, and lanterns be acquired. The then existent Council agreed and passed the word to their constituents. When apprised of this decision one of the District Meetings virtually ended in a riot. The following day the Civil Administrator was advised by the Chief Commissioner that the people desired a larger council, each member representing a smaller constituency, which would more clearly represent the will of the people. This was gladly acceded to and in collaboration with the council a Charter was drawn up for consideration a copy is attached as enclosure (E). Under the new charter representation was based on a population apportionment of 400, including men, women and children. This gave one councilman for each 85 heads of families approximately based on the average count of 4.7 members per family.

A mass meeting was held in Chalan Kanoa which was attended by a majority of the voting group. The articles of the Charter were read and explained. Discussion was invited on each article as read, with a surprising participa-

PART I - NATIVE AFFAIRS

Section C - Self-Government (continued)

Civil Government - Local (continued)

Unanimous adoption followed. The point which seemed to invoke the questions of may was their right to freely campaign and electioneer. Upon being assured that this was an important point of our democratic processes further questions practically ended. Universal suffrage over 18 years was adopted.

It would appear that the last elections held though presumably free, had been rather vigorously regulated and circumscribed. Every effort of this Unit was bent toward assuring an absolutely free election this time and it is our belief that we accomplished just that.

Mr. Elias Sablan was reelected Chief Commissioner by a huge majority. The poll, at the end of the first evenings count of ballots from five precincts, found him in third place. As the Carolinian vote was tallied however Sablan left the other two major contenders far in the rear.

A fine group of men was elected to fill the 13 Council seats.

2. Number and Classification of Officials.

The new Municipal Administration is as follows:

(a) The High Council - A legislative body comprised of one representative from each of the thirteen (13) precincts, called "Councilmen." To serve for one (1) full year without pay.

(b) The Board of Commissioners - An executive body comprised of:

1. A Chief Commissioner elected by the people to serve for four (4) full years at an annual salary.

2. Commissioners for Public Engineering, Finance, and Education, appointed by the Chief Commissioner and approved by the High Council. To serve indefinitely at an annual salary.

3. Degree and Character of Civil Administration Supervision:

Supervision by Civil Administration authorities becomes less paternalistic as the people demonstrate their ability to manage their own affairs. A Civil Administration official regularly attends the weekly meetings of the Council but interposes himself only when called upon for advice and counsel.

4. Finance:

The most serious problem to be met at once was that of establishing an annual budget and accompanying program. How much could the people afford to pay for essential services, including Municipal Administration, teacher salaries, repair and maintenance of village roads, disposal of trash and garbage, electric lighting and power. Civil Administration would continue to pay for school supplies, police protection (Insular Constabulary), medical care, and sanitation. For two weeks, meeting daily, the Council wrestled with this problem. An original budget estimate of approximately \$78,000 was gradually pared down to a final figure of \$62,520, including electricity, with unfortunate but

PART I - NATIVE AFFAIRS

Section C - Self-Government (continued)

Civil Government - Local (continued)

Necessary cuts all down the line. Especially hard hit were the Engineering and Education Departments.

It was decided that Operating costs of electric lights and power would be charged directly to the people using these services on the basis of the number of light outlets and type of electric appliances in use. Cost of lighting the School, Church, Police and Administration Buildings would be paid out of village funds. An accurate estimate of the cost of supplying electricity cannot be determined until an average of several months operation has been reached. Charges will then be correspondingly adjusted.

The final annual budget estimate, is submitted herewith:

<u>Title</u>	<u>No.</u>	<u>Monthly Rate</u>	<u>Monthly Gross</u>	<u>Annual</u>
Chief Commissioner	1	\$ 159.37	\$ 159.37	\$ 1,912.44

Tax Program: Prior to 1 July 1947, the people of Saipan were subject to no taxes other than for business licenses and an annual levy of \$1.20 per family for the upkeep of the local cemetery and operation of two (2) movie theatres.

The present tax schedule, effective 1 September 1947, and subject to further revision, is listed herewith. Additional taxes on marriage and birth certificates will become effective in the near future.

The following schedule of taxes, passed by the High Council and approved by the Civil Administrator, becomes effective as of the 1st of Sept. '47.

(A) Head Tax	\$ 2.00 per person.
(B) Native Owned Vehicles:	
Bicycles	\$ 1.00 Per Year
Jeeps	5.00 " "
Weapons Carrier	10.00 " "
Standard Passenger Car	10.00 " "
Truck	15.00 " "
(C) Sales Tax:	
Beer	\$.02 per can.
Coca-Cola	.01 per bottle.
Ice Cream	.01 per cup.
Ice Confection	.01 per cup.
Jewelry	25% Ad Valorem.

Taxes on marriages and birth certificates will shortly be levied.

PART I - NATIVE AFFAIRS

Section C - Self-Government (continued)

Civil Government - Local (continued)

5. Rota:-

The Civil Administration Unit on Rota, comprising four (4) enlisted men, will be closed out and the men transferred to Saipan as soon as transportation becomes available after 1 October. It is believed that the people of Rota will progress satisfactorily without the assistance of this unit. Basic food requirements are adequately met through subsistence farming and fishing; medical needs are attended by a competent health aide; a fine school house has been built and an excellent teacher sent over from Saipan; the local priest, an American Capuchin, is exceptionally well qualified for his work; the people of Rota own a small vessel which regularly and profitably carries farm produce to Guam. It is expected that frequent inspection trips will be made by plane from Saipan and that passengers will be transported to and from the island as shipping becomes available.

Five (5) field trips were made during the quarter.

6. Bonins:

A report of the one logistic support and inspection trip made to the Bonins during the period is attached as a supplement to this report. Another trip is scheduled for early October.

(b) Regional

None.

(c) Development and Expansion Program:

The economic development of Saipan with emphasis on privately operated enterprises, is receiving the full support and encouragement of the Civil Administration Unit. When a sound economy is firmly established the island of Saipan, and when the people are earning money over and above their essential living costs, an effective program of planning and development may be instituted. During the period of this report there has been little time for long-range planning. Attention has been devoted almost exclusively to the people.

Thirty (35) new business licenses were issued during the period. Cattle registered totaled only seventeen (17) as compared with fifty-five (55) from the previous period. Reasons for this decline are being investigated. Failure to report appears to be the chief reason.

2. Justice

(a) Local Courts:

1. Native Courts. No Changes.
2. Summary Provost Court. No Changes.
3. The Village Magistrate Court, Judge Appointee Elias P. Sablan presiding, tried five (5) cases during the quarterly period as follows:

PART I - NATIVE AFFAIRS

Section C - Self-Government (continued)

Justice - Local Courts (continued)

1. For illicit sexual relations; six (6) months confinement at hard labor.
2. For assault - case dismissed.
3. For petty theft - \$15.00 fine and probation for six (6) months.
4. For assault - case dismissed.
5. For disturbing the peace - case dismissed.

(b) Regional Courts

None.

3. Summary

The incidence of native crime continues to be negligible. See Public Safety Report, Part II, A, 1 and 2.

Section D - Economic Development

1. Agriculture:

(a) Civil Administration Farms - None.

(b) None.

(c) Agricultural Cooperatives:

The previously-reported merger of the two competing farm associations is in an unsatisfactory condition. The members are constantly bickering with one another. It is evident that the present organization will disintegrate, unless a newly-elected President-Manager exhibits more ability than has been shown by the present officer of the association. This condition is not one which, it is believed, should be viewed with any particular alarm by Civil Administration. The native people do not usually cooperate with one another to any marked degree, except within the framework of the individual family. Group cooperation, when tied in with all of its economic implications, will be forthcoming when it becomes a matter of economic survival for the group.

The movement of the native farmer back to his own or assigned government land, is still in process. It is estimated that during the rainy season of 1948 will mark a really sizable increase in the amount of produce which will be available for market. The movement of the farmers back to their own lands is being expedited by the emphasis placed upon Land Claims by the Civil Administrator.

Agricultural production for the quarter is as follows:

(a) July production	5,283 lbs.	Revenue\$ 249.36
(b) August production	17,750 lbs.	Revenue 1,017.71
(c) September production	43,995 lbs.	Revenue 2,074.02

It is believed that the production for the final three months of the season will top, or at least equal that of September.

PART I - NATIVE AFFAIRS

Section D - Economic Development (continued)

2. Fisheries:

(a) None.

(b) Commercial fishing has been the subject of intense work during the past quarter to bring the operations into focus with the existing local market. The Saipan Fishing Company, Inc., as of 15 August, secured the three electrical refrigeration units on the company premises. This was done upon the advice of the Civil Administration. The costs of maintaining the refrigeration units and the power generating plant, in addition to the difficulties of keeping both sets of units in operation, were prohibitive to the native company. At the company stockholders meeting where it was decided to secure the mechanical apparatus at the fishing base, the Civil Administration approved the company acting as collectors of Coconuts in the Northern Islands. It was also approved that the company could bring back wild goats and cattle from the Northern Islands for sale. The company was directed not to operate on Ascencion, Pagan, Tinian or Rota Islands.

Plans are being formulated for a sound system of transporting fish to the Guam market, under refrigeration.

July			
Fish	12,760 lbs.		Revenue \$2,777.11
August			
Fish	5,730 lbs.		
Lobster	422 lbs		
Beef	615 lbs		
Pigs	56 lbs		
Birds	215 lbs		
Coconut Crabs	147 lbs		
Bitternuts	4,810		
Coconuts	16,300		Total Revenue \$2,853.78
September			
Fish	5,616 lbs		
Lobster	96 lbs		
Beef	3,193 lbs		
Coconut Crabs	743		
Goats	73		Total Revenue \$4,142.86

It is believed that this company will prosper if they stick to fundamentals. Their future plans include running cattle in the Northern Islands, pig raising, copracutting and cultivated lobster beds. They are receiving all possible encouragement from Civil Administration.

(c) No Change.

3. Mining

No mining enterprises on Saipan.

PART I - NATIVE AFFAIRS

Section D - Economic Development (continued)

4. Handicraft:

(a) Handicraft sales for the quarter totalled \$6,832.45. The profit for the members of the Handicraft Association amounted to \$310.38. During the quarter there had been considerable dissatisfaction voiced by the members of the association. Therefore, at the end of the quarter a meeting of all members was held and it was decided by proper vote to discontinue the Handicraft Association. Future sales of handicraft on Saipan will be done by licensed dealers, who will purchase from producers. A number of members, indicated that they planned to obtain licenses to retail handicraft and sell those things they produced direct. It is the opinion of Civil Administration that this new independent operation will increase sales of handicraft and improve quality, as a result of the competition which will be the natural result of the new mode of operation.

(b) No Change. See previous report.

(c) No change.

5. Copra:

No Copra production on Saipan at this time. Plans for Copra production in the Northern Marianas Islands are still in process.

6. Bank of Guam - Saipan Branch:

The following statement of the Bank of Guam, Saipan Branch is the quarterly report of operations for period ending 30 September 1947.

Dentists	1	235.00	75.00	160.00
Fish Markets	10	5,340.65	4,122.49	1,218.16
Florists	2	852.90	136.43	716.47
Garages	15	3,989.25	1,540.33	2,448.92
Jewelers	11	3,278.38	1,450.80	1,821.58
Laundries	26	7,564.00	6,674.39	889.61
Lawyers	1	160.00	- - - -	160.00
Massage Operators	1	123.00	- - - -	123.00
Photographers	5	135.00	76.00	59.00
Plumbers	2	218.18	80.00	138.18
Pool Hall Operators	1	375.00	225.00	150.00
Radio Repairmen	2	750.00	435.00	315.00
Religious Statue Makers	1	100.00	- - - -	100.00
Restaurants	3	1,654.40	1,128.86	525.54
Watch Repairmen	3	656.66	165.40	491.26
Stone Grinders	1	245.00	45.00	200.00
	<u>187</u>	<u>\$78,647.91</u>	<u>\$51,031.72</u>	<u>\$27,616.19</u>

There were forty (40) new business enterprises authorized during the quarter.

8. Trade Store Operations:

There are twelve (12) food and general merchandise stores in operation on Saipan. All stores are individually owned and operated. An increasing number of these stores are opening up their own avenues of supply from both the United States and Guam. This development has widened the variety of foods and merchandise which is now available to the native people. It is expected that further improvement in this situation may be expected.

<u>Sales</u>	<u>Expenses</u>	<u>Profit</u>
\$57,884.68	\$52,712.44	\$5,172.24

The twelve (12) stores employ nineteen (19) persons.

PART I - NATIVE AFFAIRS

Section D - Economic Development (continued)

9. Exports and Imports:

During the quarter, the newly-formed Saipan Importers did the volume of business shown below. A sizable increase should be forthcoming during the closing quarter of the calendar year.

<u>Sales</u>	<u>Expenses</u>	<u>Profit</u>
\$63,696.67	\$55,906.00	\$7,790.67

10. Training:

No Change.

11. Summary and comment:

Saipan has unquestionably made economic advances during the past year. However, it is believed that the economic position on Saipan is sometimes seen in a somewhat distorted manner when compared to the economy of Guam. The people of Saipan are now paying, in many instances, higher prices for essential food and clothing items than is paid by Guamanians.

With the cessation of U. S. C. C. functions, which is now to be replaced by the Island Trading Company of Micronesia, as in other areas of the Trust Territory, this will become even more exaggerated.

The reports of new businesses in the past may have sounded an optimistic note, but a sound economic is not built on ice cream parlors.

This unfavorable position is a matter of concern in view of the fact that the people of Saipan receive only seventy five percent (75%) of the Guam wage scale. In addition to developing some exportable merchandise or produce, it is believed that the matters of wage payments and cost of living must be reviewed at an early date with a view to bringing Saipan wages up to the Guam level. This however will not bring in any more actual cash dice to the limitation on government spending.

Section E - Education and Social Service

1. Education:

(a) No. of Schools:	1
Kind of School:	Elementary
Location of School:	Chalan Kanoa Village.

(b) Attendance:

As of September 30 - Total 932.

As of July - August - up to September 7 - Total 114.

<u>Ages</u>	<u>No. of Girls</u>	<u>No. of Boys.</u>
6½ years	83	49
7 "	30	38

	466	466

(c) Teachers: As of September 30th. Total 14 - All Classroom Teacher

<u>No. of Teachers.</u>	<u>Rate of Pay</u>	<u>Earnings</u>
3	\$103.12	\$309.36
3	60.93	182.79
7	56.25	393.75
6 (Apprentice)	20.00	120.00

(d) Teacher Training: Teacher training is discontinued. Apprentice teachers are enrolled with the eighth grade afternoon class section and are being used as teachers aids assisting teachers who have 60 children in their classes, during the morning.

(e) Parents Teachers Association: The parents teachers association has 20 new members bringing the total members to 535. The treasury balance is \$425.80. The capital has been accumulated from dues amounting to \$.25 per teacher a month and .10 per member parent. This money is intended to help needy children and for special improvements to the school equipment. Close cooperation is always maintained between the parents and the teachers.

The Boy Scouts continued to meet every Thursday evening. Scouts were congratulated for good scouting by the Civil Administrator and the Native Officials.

(f) Development program: Three new rooms are completed and painted. Rooms are big enough to accomodate 150 children. These rooms are not being used however as there are not enough teachers.

Since the Municipal Government shouldered the responsibility of paying the salaries of teachers in service, the school continued to operate but, under the following conditions:

The wood craft and agricultural training schools were discontinued for lack of funds.

The teacher training classes for on the job training of teachers who are not as yet qualified to teach, but are being used for lack of qualified teachers, were eliminated as a result of the decrease in teachers in service due to lack of funds.

PART I - NATIVE AFFAIRS

Section E - Education and Social Service (continued)

Education (continued)

Any hope for salary increases or for readjustment of salary schedules now considered necessary will be abandoned. This will inevitably result in the future loss of our best teachers. Teachers are now able to earn more in other lines of work than as teachers. A readjustment of salary schedule will be necessary in the future if we are to retain our best people. If the better teachers leave, it is certain that the quality of education will be reduced.

Releasing six of our trained teachers has overloaded those remaining. Rooms are overcrowded, having as many as 55 to 60 children. For teachers with very limited experience this number is considered too great.

The quarterly allotment for education totaling \$6,225.00 is "earmarked" and can be used only for certain purposes. If the school is to improve or maintain its present standard it is considered necessary for this fund to be used to take part of the load off the Municipal Government, at least until such time as they are better fitted to take the full load.

Vocational training along all lines is considered important as many children now in school are over twelve years of age and will undoubtedly leave school within the next two years. Very few vacancies for white collar jobs exist therefore most of these children will have to farm or learn a trade.

This unit has been without a regularly assigned Educational Officer since the detachment of Lieutenant G. B. Julian on the 28th of March.

2.	<u>Religion</u>	<u>Saipan</u>	<u>Rota</u>
(a) 1.	Denominations	Catholic (almost 100%)	Catholics
	No. of Churches:	Two	One
	Location:	Chalan Kanoa - Aslito	Song Song Village
	Name of Missionaries:	Father Ferdinand Stippich Father Aidan Neenan Br. Gregorio Oroquitez	Father Mercian Pellett

2. A Protestant Mission, under the direction of Rev. Edward Stevens of the Baptist General Board of Foreign Missions, is being established on the Island.

(b) Church Schools: No Change.

(c) Relations with Civil Administration: Cordial and co-operative.

3. Recreation:

Baseball, movies, lagoon fishing, Sunday picnics, outings and private social gatherings are the chief recreational outlets of the people. A com-

PART I - NATIVE AFFAIRS

Section E - Education and Social Service (continued)

Recreation - (continued)

munity ball for public dances and gatherings would be a desirable addition to community life.

4. Native Culture:

(a) Assimilation of democratic processes is accelerating. Upon questioning it has been determined that few of the benefits of free elections were unfamiliar. During Japanese times the people selected their own village officials etc., It is believed that their standards of living were higher pre-war than now.

(b) The council has been urged to encourage the revival of folk dances, native music and early forms of recreation. There are many visitors from Guan on the island at all times and the effect is noticeable in the dress, make up, coiffure and dancing. The average Guamanian is far less inhibited than the Saipanese. The Carolinians are far more primitive socially than the Chamorro but conversely is far more energetic.

(c) Relations with Americans are very cordial on the surface. New regulations are accepted without observable opposition. This is attributed to thirty (30) years of Japanese rule.

(d) Additional comments or facts: - No Comments.

5. Summary:

No Comments.

PART II - ADMINISTRATION

Section A - Civil Administration Functions

1. Public Safety:

(a) Maintenance of law and order has presented no major problems during the quarter.

(b) The new Insular Constabulary force was established on 1 September. Nineteen (19) recruits were selected from the old native police force which numbered thirty-nine (39) effectives, and which automatically went out of existence. The new force will be trained in military and police duties by U. S. Marines. Although the reduction in personnel has curtailed the scope of their activities, there is thus far no indication that the present force will not be sufficient to provide adequate police protection for the municipality.

Desk Sergeant	1	\$107.00	per month
Patrol Sergeant	1	98.00	" "
Corporal	2	84.00	" "
Patrolman 1st Class	14	75.00	" "
Patrolman 2nd Class		70.31	" "

It is our intention to recruit one or two men on Rota on the next field trip.

(c) Offenses: None.

(d) Fire Protection: No change. No fires reported during period.

Plymouth Sedan	1	Low Bed Semi	1
Jeeps & Recon Cars	23	High Bed Semi	1
Weapons Carriers	10	Gas Trailer 3200 gal.	1
Trucks, Cargo	13	Trucks, Dump	4
Buses	2	Ambulances	2
Auto Car Tractors	2		

The above list of vehicles are those which have been taken up on the Civil Administration Unit Plant Accounts, Vehicles not taken up on the Plant Account were either surveyed to the Municipal Government of Saipan or used for salvage.

ComServPac letter serial 22490 subject, Automotives and Allied Equipment; instruction concerning, has just been received and this Unit will comply shortly.

The Municipal Government of Saipan relieved this Unit of the responsibility of maintaining the generators in the village as of 1 September 1947. Civil Administration Unit, however, still pays for and maintains the main power lines, sewage systems, and water systems. At the present time water is being piped to some eighty homes, just east of Chalan Kanoa, and plans have been made to supply those homes with electrical power in the near future.

PART II. - ADMINISTRATION

Section C - Vital Statistics

1. Summary: See enclosure (B).

Section D - Naval Personnel

1. With the arrival of replacement officers from the SONA III class the present personnel deficiency will be improved. Replacement of enlisted personnel due for rotation during the next two months is highly desirable in order to break them in on new duties prior to detachment of the present incumbents.

See summaries attached as enclosures (C) and (D).

Section E - Visits by Civil Administration Officers

1. Attached as Enclosure (E).

R. A. WILHELM
Commander, U.S.N.
Civil Administrator.
