Subj: Indigenes' Participation in Community Projects; promotion of

Ref: (a) HICOMTERPACIS ltr A1 ser 2082 of 9 Nov 1950

1. With the coming of the dry season, community effort in the maintenance of roads is more in evidence. A road grader operated by native personnel has recently been through the streets of Chalan Kanoa, Tanapag and San Roque Villages.
2. The new school in the Matansa area, built approximately 75% by community labor, has been completed in the last month and is in operation. The building was formerly a Marine Officers' Club, located directly on the beach. It is considered the most attractive school building site in the Saipan District.
3. The Village of San Roque is installing a piped water system from a spring above the village. This is being handled 100% by community labor.
4. The Tukuran section has just completed a new church with its dedication set for this date. Their next community project is the building of a school for which a site has been designated and some materials have already been gathered.
5. The Donne section has nearly completed their church and some preliminary cleaning of the school site has been made.
6. The village on Rota was recently visited and it was in its usual clean and well-kept condition. Now that the dry season has set in, the holes in the village road will be filled with coral and tamped down.
7. The Civil Administrator considers community effort in the Saipan District satisfactory.
